UNITED STATES DEPARTMENT OF AGRICULTURE  
Production and Marketing Administration  
Washington, D. C.

CONVERSION FACTORS  
and  
WEIGHTS AND MEASURES  
for  
AGRICULTURAL COMMODITIES AND THEIR PRODUCTS  
AS REVISED AUGUST, 1944

Section B - Net Content Weights of Specified Containers

## FOREWORD

This booklet is part of a two-section summary of official Production and Marketing Administration net weights and conversion factors.

To secure uniformity in connection with the preparation of food allocations and commodity accountability records, it is essential that all Branches use the same factors in projects involving conversions.

Section A, Conversion Factors, is composed primarily of factors used to convert food supplies and requirements into the units used in making allocations. These were developed from various sources throughout the Department of Agriculture, particularly the commodity branches of P.M.A.

Section B, Net Content Weights of Specified Containers, represents the packaging and net weights of commodities.

A description of the columnar headings follows:

1. Commodity. This column identifies the commodity by the name most frequently used in reports, contracts, and contract abstracts.
2. Size and/or Type of Container. This column refers to the size of the package or can and the number of packages or cans to the case unless otherwise specified; i.e., 24/2's means cases containing 24 number 2 cans to the case. Where the container is other than a case, it is shown as tierce, barrel, drum, etc.
3. Net Weight. This is the weight of the contents exclusive of the weight of the container, i.e., can, case, barrel, drum, etc., as approved by the commodity branch responsible for the purchase of the commodity.
4. Additional Columns. Where possible, other weight factors which might be required for bulk shipments or shipments not reported by type or size of package have been furnished in an additional column.

In many cases, the factors in both sections represent averages only and may not apply to an operation at a particular time or place. The net weight factors are not to be used if actual net weights are available.

## Section B - Net content weights of specified containers

## 1. Cotton and Fiber

Commodity	Size and/or type of container	Net weight in pounds	Weight per gallon in pounds
	1	2	3
Cotton.....	478-lb. bale	478	
Cotton Linters, Munitions.....	)		
Cotton Linters, Surgical Dressing..	) 600-lb. bale	600	
Cotton Linters, Plastics.....	)		
Cotton Comber Waste.....	500-lb. bale	500	
Cotton Thread Waste.....	750-lb. bale	750	
<u>Naval Stores</u>			
Dipentine.....	55-gal. drum	390.5	7.1
Gum Rosin.....	410-lb. barrel	410	
	Drum	a/	
Kiln Pine Tar.....	55-gal. drum	484	8.8
	50-gal. drum or		
	barrel	440	8.8
Liquid Rosin.....	Barrel	a/	8.3
	Drum	a/	8.3
Pinene.....	55-gal. drum	396	7.2
Pine Oil.....	55-gal. drum	429	7.8
	54-gal. drum	421.2	7.8
	53.2-gal. drum	415	7.8
Pine Pitch, Genuine.....	550-lb. drum	550	
Pine Pitch, Compound.....	517-lb. drum	517	
Pine Tar Oil.....	55-gal. drum	467.5	8.5
Retort Pine Tar, Thin Grade.....	55-gal. drum	478.5	8.7
	54-gal. drum	469.8	8.7
	52-gal. drum	452.4	8.7
	50-gal. drum	435	8.7
Retort Pine Tar, Medium Grade....	55-gal. drum	484	8.8
	54-gal. drum	475.2	8.8
	52-gal. drum	457.6	8.8
	50-gal. drum	440	8.8
Rosin Oil.....	55-gal. drum	440	8
Tarene.....	55-gal. drum	458.15	8.33
Tarol.....	55-gal. drum	484	8.8
Truline Binder.....	100-lb. bag	100	
Turpentine.....	55-gal. drum	396	7.2
	50-gal. barrel	360	7.2
Wood Rosin.....	Bag	a/	
	Barrel	a/	
	Drum	a/
